

SMART  
LAUNDRY  
TECHNOLOGY

## Professional Folding Machine

**MODEL**

**WF201402**

- ❖ Possibility of finished Linen outlet in Left or right
- ❖ Could match with any Ironer

### SPECIFICATION

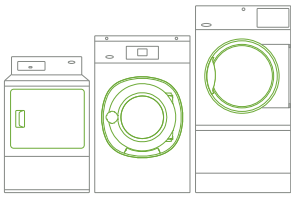

MODEL	WF-30	WF-33
MAX SIZE	3000	3300
MAX SPEED	60	60M
FOLDING METHOD	2+3	2+3
AIR PRESSURE		
POWER INPUT		
DIMENSION		

### FEATURES

TRIPLE INVERTERS PROVIDE DIFFERENT SPEEDS FOR WIDE RANGE OF ARTICLES. SPEED IS EASY TO ADJUST ACCORDING TO THE LINEN TYPE

MULTIPLE MOTORS CONTROL EVERY FOLDING INDEPENDENTLY, SAVING TIME AND ENERGY

ADJUSTMENT DEVICE INSTALLED FOR EACH FOLD

## SMART LAUNDRY TECHNOLOGY

### SPECIFICATIONS

#### EFFICIENT PERFORMANCE

- Triple Inverter controls each folding motor, is easy to adjust and has a reliable performance
- Standard bearing with base ensures smooth operation
- Excellent pneumatic components ensure high speed smooth running
- Max speed is 60m/min, could match with any high speed ironer.

#### EFFICIENT REMOVER OF ELECTROSTATICS

- Wide galvanized plate structure reduces electrostatics, ensures the first and second folding smoothly.
- Automatic copper antistatic device removes the electrostatic efficiently
- All overturned belt structure for three cross-folds, removes all residual electrostatic

#### EFFICIENT

- Big size English version touch screen control panel
- Damaged linen reject button
- 90° Revolved control panel, easy to operate

#### ENERGY SAVING

- Independent adjusting air pressure system ensures perfect supply of compressed air
- Three cross folding motors are controlled by invertors

#### SAFE AND ENERGY SAVING

- Imported clutch brakes fast start and stop, perfect for high-speed operation

#### CONVENIENT

- Flexible support is adjustable to suit the height of any ironer. There is no need to disassemble the frame.
- Throttle valve in pneumatic system is adjustable according to linen for perfect folding
- Static electricity removal switch for easy operation
